

A Different Angle

Much more than a typical bedroom, this suite is a peaceful retreat.

The goal of this master suite was not only to fulfill the practical requirements of the homeowner, but also to create a space that embodied larger intangible qualities: relaxation and repose. The various elements of this project were orchestrated to contribute harmoniously to the overall effect. With dual fireplaces, maple cabinetry, cobalt tile work, and a number of built-in niches and alcoves, this suite is a welcoming, peaceful retreat for the homeowners.
